Safety First

The invention of the automobile and the rapidly with which it has come into general use has worked a revolution in the lives and habits of people comparable only to that brought about by the introduction of the steam locomotive. The steam railway made possible the enormous expansion and development which marked the nineteenth century. It spanned the continents, brought isolated settlements into touch with centres of population, opened vast areas to settlement, and made possible our highly developed industries by providing the means of transportation of their products to far distant markets. It broke down the provincialism in which so many people lived through making travel possible, thereby dispelling much of the ignorance and suspicion of other people and countries which prevailed.

The automobile is now further developing and extending these benefits to mankind. To a greater extent possibly than even the railway, the motor car is bringing city and country parts into closer touch and understanding. The average farmer of today is not isolated as was the case twenty years ago. A day's journey to town by a horse-drawn vehicle is now a matter of only two or three hours, with all that this means in service of all kinds to the rural home.

And the city man and his family, who formerly spent their vacations going by rail to other cities, are now to an increasing extent every year making use of their motor car to tour the country. Week-end trips to the country are a popular pastime, and picnic parties away from the city for twenty, fifty, one hundred miles to beauty spots in the country are of daily occurrence. The country thus reaps the advantages of the city, and the city is enabled to enjoy and appreciate the country.

The farmer has long suffered inconvenience and loss through lack of good roads. Even he did not fully appreciate just how great was the loss thereby sustained in the hauling of his products to market, with the result that not infrequently he opposed expenditures necessary to the construction of good roads and bridges. To an even greater extent, the city dweller was averse to increasing taxation for the purpose of rural road building. The automobile has changed all this, and today both city dweller and rural resident is clamoring for the building of good roads. Hundreds of millions of dollars are being spent on roads and the farmers are reaping the benefit in reduced costs in hauling their products to market.

Thus are the habits of people changing, and radical improvements being brought in the economic life of the country. The automobile has, of course, also created new problems. Congestion of traffic in centres of population is one of them, and cities lacking wide thoroughfares now find themselves in difficulty, while in all the more populous cities, congestion in the downtown sections is so great that the most stringent traffic regulations and control have to be enforced.

The use of the motor car having become almost universal, the most serious problem of all is the avoidance of accidents. Cars are driven by all kinds of people, old and young; those who are careful and those who are careless, even reckless; nervous people and daredevils. Although the great majority are, no doubt, careful drivers, one reckless person, having little or no regard for others, may be responsible for much damage and suffering. There are the "road hogs" and the "speed fiends" who sacrifice everybody to their own desires and selfishness.

Admitting there are fewer accidents than would be the case if the same number of horse-driven vehicles were on the streets and roads, the number of motor accidents is far greater than it should be or there is any necessity for. Hence the importance of the Safety First campaigns now being organized in different parts of the country, such, for example, as the one in Westchester County, N.Y. On June 1 last, the 41 communities in the county jointly started a Safety Week campaign—a short, intensive drive to impress on all residents and tourists alike, with the necessity of exercising care. During the week in this county of 400,000 population, and through which 100,000 motor-driven vehicles pass every day, to and from New York City, there was only one death and six serious injuries, as compared with an average of 18 persons killed each month during the preceding four months, not to mention hundreds seriously injured.

What is being accomplished in Westchester County can be repeated all over the country if sufficiently energetic steps are taken to impress on everybody the absolute necessity of the greatest care being exercised in view of the changed conditions, which the almost universal use of the motor car has brought into our present-day civilization, and the inflicting of drastic punishment on those who persist in disregarding all laws and the rights of others.

Young Lady (to artist).—"Would it be possible for you to take the picture, you've painted for my husband and change it to a landscape? I'm going to get a divorce."

Praxil produces four-fifths of the coffee consumed by the world.

CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opium. The genuine has signature of

Canada, in proportion to population, has fewer divorces than any of the English-speaking countries of the world.

It is not too early to register a solemn vow to swat the man who calls it Xmas.

A Simple Luncheon

Carefully Prepared Recipes For a Tasty Meal

One runs out of ideas for a simple, nourishing, tasty luncheon, especially for a fish day or for warm weather. Hereunder is a suggestion with recipes which have been carefully prepared.

Cream of Green Pea Soup.—1½ cups Borden's St. Charles Milk; ¾ cup cold water; 1 teaspoonful sugar; ½ teaspoonful scraped onion; 2 tablespoons butter or butter substitute; 1½ tablespoons flour; 1 teaspoonful salt; ½ teaspoonful pepper; 1 cupful canned or cooked fresh peas. Add the peas, sugar and onion to the cold water and simmer for twenty minutes. Then rub through a sieve; add the evaporated milk, reheat and thicken with the flour blended with the butter and the seasonings.

Steamed Salmon with White Sauce.—1 slice salmon, about 3 pounds; 2 hard-boiled eggs; Parsley. Once the recipe for white sauce is wiped off the salmon with a damp cloth; lay it on a well oiled plate, dust lightly with salt and pepper, and steam for thirty minutes. Then carefully remove the skin, transfer the fish to the centre of a medium sized platter, surround with the white sauce and garnish with the egg cut in sixths, and the parsley.

Custard Pie.—¾ cupful Borden's St. Charles Milk; 1¼ cupful water; 2 eggs; 4½ tablespoons sugar; ¼ teaspoonful salt; few drops nutmeg extract; grated nutmeg; pastry. Line a deep pie plate with the pastry. Beat together the eggs, sugar, salt and nutmeg extract, then pour in the evaporated milk and water. Mix well, pour into the lined plate, grate over a little nutmeg. Bake in a quick oven at first to set the rim, decrease the heat afterwards, as egg and milk in combination need to be cooked at low temperature.

Clark's Canadian Boiled Dinner

A complete meat and vegetable complete. Prepared from "Canada Approved" prime beef and a variety of fresh vegetables with a tasty beef gravy. Simply heat and serve. "Let the Clark's Kitchen help you."

Princesses in Business

There are now thirty-four Russian Princesses in England engaged in business, says an English correspondent. Strange to say, while many find it hard to make a living, these exalted refugees all seem to prosper, although some of them can scarcely speak a dozen words of the English language correctly. One charming Princess sells puppies and claims to be making a cool £7,000 per annum.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the "nightmare" conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby drugist.

Tattooing the owner's name on the wrist is said to have supplanted the wrist-watch as a fad among English girls.

Minard's Liniment for Sprains and Bruises

A novel insurance policy has just been issued by Lloyd's underwriters. It insures against death from excessive laughter while in the theatre.

Mittler's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is unperceivable. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Calgary, Alberta, is said to have more telephones in proportion to population than any other community on the American continent.

Internally and Externally it is Good. The crown property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Last year nearly 700 persons were killed in London street accidents, while there were 72,000 non-fatal accidents.

Minard's Liniment for Dandruff

BROCKVILLE FARMER SUFFERED 20 YEARS

"Les" Booth Finally Got Relief Through Taking Tanlac.

"Since taking Tanlac I feel so fit it sometimes seems like a dream for there was hardly a day in 20 years that I did not suffer." Is the striking statement of Geo. L. ("Les") Booth, 271 Perth St., Brockville, Ont., one of the best known farmers in Ontario. "For 20 years, up to three years ago when I took Tanlac, I suffered from rheumatism in my arms, shoulders, back and hips, so bad at times I could not lift my arms to put my coat on. I couldn't even write my name and I

just limped about like a cripple. Many a night it looked like I would not live to see daybreak and once I was laid up six months unable to hit a lick of work.

"Money could not buy the good Tanlac has done me. It ended every sign of rheumatism and built up my weight 16 pounds, and since then I have not had a rheumatic ache of pain. If anybody wants to know about Tanlac, just let them see Les Booth."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Take Tanlac Vegetable Pills for constipation.

New Chateau at Lake Louise

Contract for the reconstruction, on a steep rock basis, of the wing of the Chateau Lake Louise, recently burned, has been awarded to Carter, Halls and Aldinger, of Winnipeg. The new addition provides for an increase in the number of rooms and will be completed by June 1st, 1924, in time for next summer's tourist travel.

Says World Slowing Down

The rotation of the earth on its axis is gradually slowing down, Dr. A. C. D. Crommelin told members of the British Astronomical Association. "In a few hundred million years," he predicted, "the sun will shine on one side only, the other side will be wrapped in frozen darkness, and the moon may vanish altogether."

VARYING YIELDS ARE INDICATED IN CROP REPORTS

Ottawa.—Reports of crop conditions in the prairie provinces on August 31, compiled by the Bureau of Statistics, indicate greatly varying wheat yields in different territories. From Northern Manitoba, cutting of wheat is reported as complete, and (threshing general. "Cereals yields are better than for several years, some fields of Marquis wheat yielding 40 bushels." It is reported. The Manitoba Department of Agriculture reports wheat two-fifths cut in Southern Manitoba on September 1, and cutting just beginning in the north. "Rye and barley cutting well advanced; frost damage small, and but less slight; rust damage negligible in Manitoba, but some loss in places." Brandon reports estimate the yield at 18 bushels.

Reports from Saskatchewan on August 25 are encouraging. "The best crops are in the southern part of the province. It is reported, but a marked improvement is apparent in the east, central and northern districts. Wheat cutting general about the end of the month. From Swift Current yields are estimated at from 10 to 30 bushels an acre.

Harvesting is proceeding in Alberta under varied conditions. At the end of the month the cutting in the southern section of the province was from 15 to 25 per cent complete. In the southern areas late rains have improved the grain crops somewhat, and warm weather has aided the filling process to such an extent that yields in some districts will be larger than anticipated.

Notwithstanding the late rains, however, there is a very large area in Southeastern Alberta where the yields will be very light. It is reported much of the grain in these sections will be cut with headers. This process is now going on, being hampered in some sections by heavy growth of weeds, which developed as a result of the late rains. "The experimental farm at Lethbridge reports that the general rains in August greatly improved the feed situation at the end of July. Yield of late seeded coarse grains will be materially improved, but the effect on wheat, beyond better filling, will not be much.

Diamond Robbery in Toronto

Merchants Lose Valuable Papers and \$15,000 Worth of Jewels

Toronto.—Assorted diamonds valued at \$15,000 were stolen from the office of R. Strauss and Sons, wholesale diamond merchants. The combination lock was, apparently, cut out by means of a cold chisel, no explosive being used, as is generally the case. The whole lock was lying on the floor beside the open door of the safe.

In addition to the diamonds, the firm lost insurance papers and a number of stock certificates. The safe was absolutely empty when found by the caretaker.

Ontario Prohibition Issue Toronto, Ont.—The prohibition issue will be before the people of Ontario on October 23. On that date the electors of this province will express their opinions on questions intended to guide the Government as to the continuance of the Ontario Temperance Act, or some other form of legislation relative to the sale of intoxicants. Political observers look for one of the most strenuously conducted plebiscite elections in the history of this part of Canada.

Says Canada Wants Navy Quebec.—There is a growing sentiment in Canada in favor of Canadian participation in a scheme of naval defence, and practical expression will be given to this sentiment when Canada's overseas export trade assumes larger proportions. This was the opinion expressed by Vice-Admiral Sir Frederick Bell prior to the leave-taking of the British Special Service Squadron.

Saskatchewan Farmers Can Get Advance On Pool Wheat

Regina, Sask.—While the initial payment to be made on delivery of pool wheat is yet undecided, and no advances have yet been made in respect to grain delivered at elevators, it is possible for the farmers to secure an advance on the bill of lading by applying to the head office of the Saskatchewan Wheat Pool organization in Regina, according to a statement issued. The advance, it was stated, would depend on the quality and other factors. Officials of the pool stated that they expected to have 7,000,000 acres under contract before the close of the season. The initial objective was \$186,000 acres.

Collect Customs Duty At St. Paul Yards

New Arrangement With U.S. Importers To Cattle Shippers

Winnipeg.—In future customs duty on cattle being exported from Canada to the United States via Winnipeg, will be collected at South St. Paul yards, and not at Emerson nor on Winnipeg stock yard weights, as heretofore. This very important announcement was made by O. Freer and W. J. MacDougall, of the Winnipeg Live-Stock Exchange, on their return from St. Paul, where they were in conference with United States' customs officials, bureau of animal industry representatives and local stock yard men, who have been in communication with Washington on the subject.

Mr. MacDougall, President of the live-stock stocker and feeder show, built this arrangement as being of the greatest value to Western Canadian farmers, as it will mean, he stated, the reception in the States from Canada of cattle of a much more perfect physical fitness than under the old regulations.

Home Bank Claims

Conference of Depositors to be Held In Toronto on Oct. 1st

Toronto.—I. E. Weldon, joint liquidator with G. T. Clarkson of the Home Bank, stated that good progress was being made in meeting preferred claims against the bank's assets. He said that out of \$1,700,000 notes of the bank, \$1,600,000 had been paid, and the others would be dealt with as they appeared.

In order to pay the dividend of 25 per cent to depositors, a total of \$7,700,000 had been required, of which \$2,400,000 had been borrowed from other banks, but of the latter sum \$1,600,000, or 66.23 per cent, had been paid back. The liquidators proposed to extend to deal with the obligation of \$1,200,000 to the Ontario Government, which is a preferred depositor under the law.

The national committee of Home Bank depositors, which has not met since Parliament laid over until next session the claim for compensation, has been called to a conference in this city on October 1.

Tip To Railroad Prevented Hold-Up

Sheriffs, Bearded Golden State Limited and Captured Bandit

Chicago.—A tip to Chicago, Rock Island and Pacific Railroad officials prevented a hold-up of the Golden State Limited, at Meade, Kansas. Deputy sheriffs boarded the train a few miles east of Meade, and fought off three masked men who boarded the train at the latter stop.

In the shooting that followed, two of the desperadoes were wounded, one of the bandits was captured, and the others escaped into the darkness.

Veteran Horseman Dead. Wheeling, W. Va.—Edward P. "Pop" Geers, of Memphis, Tenn., an American harness driver, and known for many years as the "grand old man of the trotting turf," died in the harness race at the West Virginia State Fair.

Has Given Up Hope Toronto.—Ontario has given up hope of being able to get Alberta coal in the coming winter.

Son of Britain's Premier

MALCOLM MACDONALD son of the British Premier, who is a member of the British university debating team which will compete against Canadian and United States university debaters.

British Milling Concern To Operate In West

Spillers Overseas, Limited, Now Actively Engaged In Grain and Milling Business

Calgary.—Spillers Overseas, Limited, the British milling company, has completed negotiations with the Alberta Pacific Grain Company, according to telegraphic information received from Montreal from Sir William Nicholls, head of Spillers' interests.

It is understood that this announcement means the acquiring by Spillers, Limited, of the controlling interest in the Alberta Pacific Grain Company. The administration is to remain the same, with John I. McFarland, now head of the Alberta Pacific, as managing director, and the present staff will be retained.

This arrangement completes negotiations carried on by Spillers during the last few months in connection with the announced intention made some time ago of investing \$6,500,000 in Western Canada. The company has already secured control of the Alberta Flour Mills, Limited, Calgary, with a daily capacity of 10,000 barrels, and is building a huge terminal elevator at Vancouver with a capacity of 2,000,000 bushels and at a cost of \$2,500,000.

The Alberta Pacific Grain Company owns and controls 283 elevators, two-thirds of which are situated in this province, and the remainder in Saskatchewan, with the exception of one or two in British Columbia.

Child Spent Night In Bush Nelson.—Wandering away up Perry Creek from where its parents were camping, the three-year-old daughter of Mr. and Mrs. D. Leith, of Weyburn, spent a night in the bush in spite of anxious search parties, and was found unharmed in the morning at 8 o'clock on the opposite bank of the creek two or three miles distant from the camp.

SCOTTISH GIRLS FOR DOMESTIC SERVICE

The Women's Branch of the Colonization Department of the Canadian Pacific Railway, Glasgow, is rapidly creating a reputation in Scotland for attracting the most efficient and experienced cook-generalists for domestic service in Canada. The number of interesting letters which these girls have sent home to their parents about Canada is the best possible tribute to the Women's Branch and also

Allied Powers to Protect Foreigners in China

Washington.—Word of action by representatives of the United States, Great Britain and France, to assure protection of foreign lives and property in the civil war zone about Shanghai, was received from American Charge d'Affaires Bell. They have asked that a declaration of neutrality be issued covering the whole Yangtze River and its mouth. American citizens in the war zone are not in immediate danger, according to Consul-General Cunningham. Bell informed the Chinese foreign minister at Peking that the whole Yangtze River from Woosung is practically one vast harbor, containing ships of every nationality, and that a naval battle in the greatest harbor in the East could not be tolerated.

Interview Premier Dunning

Moderationists of Saskatchewan Press Offers to Limit Liquor

Regina, Sask.—Answering a delegation from the Moderation League of Saskatchewan, which waited on Premier Dunning and members of his cabinet and which presented the league's desires in the way of liquor legislation, the Premier said:

"Do not believe any rumors you may hear as to legislation under consideration. The first statement will be made from the floor of the house."

The league's formal statement declared that body to be in favor of: The establishment of Government liquor stores, or agencies in the cities, towns and villages of the province for the sale of spirituous and malt liquors in sealed packages. The retail sale of beer to be consumed on licensed premises.

In that cases of infractions of the act the penalties be severe and include the cancellation of the license of the premises for a period commensurate with the offence.

Absorbs Subsidiaries

Saskatchewan Co-operative Elevator Co. Becomes Largest Grain Handling Firm in World

Regina.—The amalgamation of all subsidiary companies of the Saskatchewan Co-operative Elevator Company under the name of the parent organization is announced here.

Up to now the Saskatchewan Co-operative Terminals, Ltd., the James Stewart Grain Corporation of New York and the James Stewart Grain Company, Ltd., Winnipeg, were operated as separate units. Under the re-organization scheme these will be operated as departments of the parent firm.

The change brings the central control of the largest self-contained grain handling firm in the world to Regina. The departments of the company are now operated at Regina, Winnipeg, Port Arthur, New York and Vancouver, all administered from the head office in this city.

WORLD PEACE CAN COME ONLY BY ARBITRATION

Geneva.—The next disarmament conference must be held in Europe, not Washington, Ramsay MacDonald, the British Prime Minister, declared in explaining Great Britain's position on the great problems before the League assembly.

Mr. MacDonald expressed the conviction that any new conference, especially if it discussed reduction of land armaments, should be held in Europe, because it could best treat here conditions existing in Europe. The heads of the European states must attend such a conference if the conference hoped to accomplish anything authoritatively.

The conference would probably last several months, and the premiers must be free to come back and forth. If held in Washington, it would be impossible for the premiers to spend sufficient time there.

The Prime Minister said there was no nation more interested in the reduction of armaments than the United States; if it did not participate in any new conference, it would be a source of tremendous disappointment to everybody.

Mr. MacDonald emphasized arbitration as the best means of assuring world peace. His Government was opposed to the proposed pact of guarantees, because Britain wanted to know what it was doing, and would not sign a blank cheque. He favored some arbitration tribunal able to deliver judgments which would make for peace, and declared that Britain believed that a pact of guarantees would smash the League and make for war.

Referring to the policy of pacts for mutual assistance, Mr. MacDonald feared they would nurture what he termed the mustard seed of militarism.

Because the countries have not approved the pact of guarantees, the Premier went on, was no sign that everything was lost, but the outlook was bright; the British Government would go to the limit in backing any feasible plan.

Labor Government A Fixture In Britain

So Thinks Malcolm MacDonald, Son of the British Premier

Montreal.—There are no young Liberals being born in Great Britain today. Things have changed since the days of Gilbert and Sullivan, when every young Briton was either a "little Liberal or else a little conservative." The babies of the future are destined to be either Conservatives or Laborites. This is the assertion of Malcolm MacDonald, son of Ramsay MacDonald, Prime Minister of Great Britain, interviewed in Montreal.

"The present Labor Government is the beginning of a long Labor rule," Mr. MacDonald says. "Labor will do very well in the next election, but I don't think they will get a clear majority. It will be a taste between the Conservatives and Laborites." The Liberals would not figure much, and he does not believe that Lloyd George will ever return to power.

The star is the Conservative armaments would. The Winston Churchill whom Mr. MacDonald believes will one day be Conservative leader.

Mr. MacDonald is in Canada as a member of the Oxford University debating team, which will engage in oratorical contests in Canada and United States.

No Special Preparation For Prince

Toronto.—The manager of the Prince of Wales' ranch in Alberta, W. L. Carville, was in the city Sept. 2, enroute to the west. No ostentatious preparations were being made, he said, for the Prince's visit to his ranch.

Here and There

A respectable report comes from Brockville, Ont. Harry Church, a farmer residing five miles north of that town, is the owner of a Holstein cow which has just given birth to three calves. All are alive and thriving.

On July 11, Her Majesty the Queen of Spain and her two daughters visited the Canadian Pacific Railway's pavilion at the British Empire Exhibition. Her Majesty evinced great interest in all she saw and declared the exhibit to be "perfectly lovely."

Although the present season of ocean travel has reached the period usually associated with a falling off in the number of passengers, steamship companies report that little decrease is apparent this year and that the total volume of passenger traffic in 1924 will probably be the largest of any year since the war.

World production of silver for the first half of 1924 is 117,650,000 ounces, against 112,250,000 ounces in the first six months of 1923. Canada accounted for a production of 10,500,000 ounces in 1924, as against 10,000,000 ounces in the first half of 1923, being the third producer after Mexico and the United States, of which showed a decline.

Saskatchewan's output of creamery butter in June amounted to 1,767,056 pounds, as compared with 1,746,000 pounds in June, 1923, an increase of 41,056 pounds, or 2.4 per cent. From January to June, 1924, the province has produced 5,192,000 pounds of butter, as against 4,633,012 pounds in the same period in 1923, an increase of 558,988 pounds, or 12.05 per cent.

Among the tributes to the late Sir Edmund Oiler, of the Canadian Pacific Railway's directorate, was one from C. R. Hosmer, for many years a fellow-director. It was addressed to Vice-President Grant Hall and read as follows: "He was the last living of the great men who organized our great railway."

The late Sir Edmund became a director of the Canadian Pacific Railway in 1885, the year of the completion of the transcontinental line.

A most interesting and attractive volume entitled "Here and There in Montreal" has just been published by the Musson Book Co. of Toronto. The book is well illustrated with maps and pictures in color and brings out many noteworthy facts, such as that the city's total population is 900,000, that two-thirds of this number are French-Canadians and that Montreal is the second port of importance in North America. The author is Charles W. Stokes, Asst. Gen. Publicity Agent of the Canadian Pacific Railway.

The first annual Pow Wow of the Trail Riders of the Canadian Rockies, held at Yoho Camp, was a great success. Over 200 internationally known writers, artists, etc., rode in to gather round the sacred fire in the Sun Dance Lodge. Charles D. Walcott, secretary of the Smithsonian Institution of Washington, D.C., honorary president of the Trail Riders, addressed the gathering, a poem written specially for the occasion by Eliza Carmon was read and Chiefs Walk-in-the-Road and Buffalo Child Long Lance performed an Indian dance.

Mr McLennan Departs.

Last week there departed from our midst Mr B E McLennan, the well-known American, who came to Alberta a number of years ago and took up his abode in what is now the Brightlink district.

Since coming to this country he has engaged in farming and ranching and achieved quite a success. So much so that his steady application and labors have made inroads on his health and he was compelled to desist and left to recuperate in a less inclement climate.

He takes with him the best regards of those who have been associated with him in all movements for the betterment of the community, in which he has been noted for his enterprise, integrity and honesty.

Owing to the very short notice of his leaving and the very busy time on the farms at present, the proposal to hold a banquet in his honor had to be abandoned, much to the regret of all.

Brightlink district loses an enterprising farmer and Alberta parts with an estimable citizen.

LOST—One Bay Mare, about 7 years old, brand K C W L, left side, 2 hind legs white, white face. Notify Jac Wagner, Stony Plain P. O. 15

Students Storm and Capture Rocky Heights

The Left—Summit near the Columbia Ice Field. Mount Columbia, second highest peak in the Rockies, is seen in the background. Below—One of the peaks recently scaled for the first time in history.

Inset—Field-Harvest party nearing their objective. Right—Edward Fues, famous Canadian Pacific Railway Swiss guide, who led the Field-Harvest expedition, conquering five new peaks in the Columbia Ice Field.

Five peaks in the Canadian Rockies have just been conquered for the first time by three Harvard and Hotel-Harvest students who were accompanied by their Swiss guides. The students who climbed and named the new peaks in the famous Columbia Ice field are Oswald Field, Frederick Field and Lemond Harris of Boston. They were led by the noted Canadian Pacific Railway guide Edward Fues, the oldest guide in point of service in the Canadian Rockies. Two of the newly conquered peaks have been named Mount Harvard and Mount Hotel-Harvest after the two American universities.

The party made five first ascents including the hitherto unconquered Mount Patterson, 10,400 feet, Mount Sir James Outram, 10,700 feet, the South Twin, 10,500 feet, and the unnamed peaks, Harvard and Hotel-Harvest. Besides all this they discovered a new route to the top of the second highest peak in the Rockies, Mount Columbia, 12,000 feet, which was made in a return journey of twenty-three hours. The aim of the exploring party, to conquer the South Twin, was successfully attained.

The Field-Harvest party left Lake Louise five weeks ago accompanied by two guides, five packers and nineteen horses, and travelled 200 miles into the Columbia ice

field. Their progress was halted several times by the terrible winds from the ice fields and once they were forced to halt a day at Mistayah lake in order to make foot of Mount Patterson, they put up a bivouac camp and accompanied by the wind howling of the wild ice winds of this district spent most of their night thrashing a ukulele and singing warm southern songs.

Lemond Harris had his own Swiss guide with him, Joseph Blaser who has guided him for many years in the Canadian Rockies since 1908 was the man who successfully maneuvered this valuable expedition. The greatest novelty of the trip, he stated on his return, was the meeting of fourteen American girls on the lonely forks of the North Saskatchewan River, who were travelling alone with their packers. The girls insisted that the party stop off for dinner with them that night, following which a note of civilization was added to their wild northern environment by the sound of the ukulele and the swish of dancing feet over pine needles dimly lighted by a bluish fire lamp fire.

MUNICIPAL DISTRICT OF SPRUCE GROVE NO. 510.

PUBLIC NOTICE is hereby given that there has been introduced in the Council of the Municipal District of Spruce Grove No. 510, a bylaw of which the following is a short synopsis: To prohibit the running at large of domestic animals in certain parts of the municipality; and that a copy may be seen in each of the following places: The Office, Spruce Grove Township, The N. W. corner 7-53-27-4; S. E. corner 6-53-28-4; N. W. corner 7-53-28-4; S. E. corner 1-53-28-4; N. W. corner 3-53-28-4; N. E. corner 3-53-28-4; S. W. corner 3-53-28-4; N. W. corner 10-53-27-4; S. E. corner 28-53-27-4; and N. W. corner 31-53-27-4; and further, that unless within thirty days from the publication of this notice at least forty resident electors of the municipality petition the Council to submit such bylaw to the vote of the resident electors of the municipality the Council will proceed to pass the same.

The Apple Is A Most Attractive Fruit

British Columbia Apples. Note: For Their Intense Color

The beautiful coloring of the B.C. apples makes them specially attractive. The cause of color is not thoroughly understood, but it may be said that each variety of apple has a color peculiar to itself and it only requires the proper conditions and chemical changes to develop them. It is well known that sunlight is an important factor in color development, helping to intensify the coloring of the apple. In warm dry seasons such as this has been on the Pacific coast, fruit matures earlier than in wet seasons. Where the fruit is permitted to mature on the tree before it is harvested, the higher and more beautiful the color will be.

British Columbia apples are noted for their intense color. In most districts the land is irrigated, and by stopping irrigation and causing a ripening of the tree the fruit more thoroughly matures and partakes of the rich colors which make the fruit of B.C. notable.

There is a wide variety of ways in which apples may be prepared for the table and there is no lack of practical recipes which are suitable for any home or table in any part of the country.

Dutch Apple Cake.—Two cups flour, half teaspoonful salt, two teaspoonfuls baking powder, four tablespoonfuls butter, one cup milk, all level measurements, pour butter into greased baking dish, cover with four apples peeled and sliced, sprinkle two tablespoonfuls sugar and one quarter teaspoonful cinnamon over them and bake in moderate oven about 25 minutes. Fill a baking dish three quarters full of sliced tart apples and sugar. This may be covered with pie crust, soft biscuit dough, or a batter of one cup sweet milk, one small teaspoonful salt, one egg, one teaspoonful soda, two teaspoonfuls cream of tartar, and four to make a stiff batter.

Apple Catsup.—Quarter, core and pare 12 sour apples. Put in a saucepan, cover with water and let simmer until soft; nearly all of the water should be evaporated; rub through the sieve and add the following to each quart of pulp: One cup of sugar, one teaspoonful of cloves, one teaspoonful of mustard, two teaspoonfuls of cinnamon, and one tablespoonful of salt, two cups of vinegar and two grated onions. Bring the catsup to a boil and let simmer gently for one hour. Bottle, cork and seal.

Apple Ice-cream.—One cup of sugar, one cup of water, one half-teaspoonful cream of tartar; heat gradually and boil without stirring until the syrup will thread when dropped from a fork. Pour slowly over the well-beaten white of one egg, beating constantly, and continue until thick enough to spread. Add two tablespoonfuls of grated apple, beat and spread on the cake.

Corns Between the Toes Painlessly Removed

Alberta Wheat Pool

Handled Over Thirty-Four Million Bushels of Wheat Last Year

Alberta's wheat pool, the first established in Canada, distributed \$37,720,776 in the initial year of operation, which closed July 15, according to an announcement made by Manager Chester Elliott. The first and the payments totalled \$31,324,776, and the final payment amounted to \$6,395,000. The pool handled between 34,000,000 and 35,000,000 bushels of wheat, the exact figures are not yet obtainable and practically all this grain was of very high grade. The net return to local growers was about 85 cents a bushel.

The city of Lima, Peru, has an earthquake about once a week, but in ten years there has been no loss of life or property. Slight jars and heavy rumblings are the chief characteristics.

If riches have wings a man may be able to chase the slightest dollar more successfully with the aid of an airship.

Minaid's Liniment for Aches and Pains

No woman can be homely who does this

A simple method which safeguards lovely complexion—the beauty every woman can possess.

No girl or woman can be called unattractive who has kept the beauty and radiance of youthful complexion.

And today millions of women know this simple method. You too may employ it to keep lovely and young the clear, fresh skin Nature gave you.

This is all you need

Make the skin regularly, as

Made in Canada

PALMOLIVE

Value and efficiency produce 25c quality for

10c

thorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rinse again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

SUNDAY SCHOOL LESSON

SEPTEMBER 14

JESUS DRIVEN FROM NAZARETH

Golden Text: He scorned me to preach good tidings. Luke 4:15.

Lesson: Luke 4:16-20.

Devotional Reading: Isaiah 61:1-3, 10, 11.

The Text Explained and Illumined

The Mission of Christ, verses 16-21. Jesus came to Nazareth, where he had been brought up and where he had lived through his early manhood until the age of thirty; and on the Sabbath he entered the synagogue, as his custom was. He had come back inspired for his unique work, he continued to frequent the place of worship. "Custom is the fifth element in the universe," says a Syrian proverb. "Habit is ten times nature," said the Duke of Wellington. "Being a boy's complaint about the rigidity of parental insistence upon church attendance, than a man's sense of some habit during the habit-making years of life," Bishop Vincent was wont to affirm. "I have known more in the word and revelation of God than his fellow-worshippers. The rites were simple and archaic. Nevertheless, he made it his custom still to join in the old habits and to keep up the practices of public service. And this is more significant than we sometimes realize. It is a reminder of the truth which, in our fancied egotism, we are apt to forget—that the holiest personal life can scarcely afford to dispense with the force of old custom, and that the regular public worship of the Church, for all its local imperfections and faults, is a necessary provision for sustaining the individual soul. We cannot affect to be wiser than our Lord in this matter. If any one could have pled that his spiritual experience was so lofty that it did not require the stimulus of public worship, many one might have felt that the consecration and communion of his personal life exempted him from what ordinary mortals needed, it was Jesus. But He made no such plea. Sabbath after Sabbath even He was found in the place of worship, side by side with God's average people, not for the mere sake of setting a good example, but for the deeper reasons of fellowship with God and man" (James Moffat).

Tourist Traffic in Quebec

Tourist traffic in the province of Quebec in the past year or two has developed into one of the province's most important industries, and in order to make better known the attractions which this province has to offer to the tourist, the Provincial Government has authorized the expenditure of some \$50,000 for advertising and publicity purposes. The money will be spent in conjunction with the Quebec Tourists' Association.

Why suffer from corns when they can be banished forever by using Holloway's Corn Remover.

In 1876 there were but 15,000 radio receivers in the country. Now there are 5,000,000, and with loudspeakers and extra head sets probably 10,000,000 people listen in every day.

For Corns and Warts—Minaid's Liniment

Powers Of Death Ray

Matthews Says He Will Give Invention To Britain

Once the "death ray" is perfected, it would bring down a fleet of attacking aeroplanes in a charred and twisted mass of wreckage. H. Grindell Matthews, inventor of the supposedly death dealing device, said in New York as he came for England.

It will require eighteen months' work and \$250,000 expense to perfect the ray beyond its present limitation of 40 feet, the inventor said.

Matthews said that since coming to the United States, he had been offered a big price for his invention by another foreign government, but would stick to his determination to give it to the British Government.

"The British Isles are no longer islands, with the development of aeroplanes," he said. "It is my purpose to perfect a defense in the death ray."

A Power of His Own, Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been praised by the leading liniment for man and beast.

"Fellowship Inn," to be established at Bellingham, England, will be a new experiment in a combined community centre and bar.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Extirminator, an excellent remedy.

Among the countries of the world Canada stands first in the percentage of its population living in electrically lighted homes.
